JOURNAL OF ELECTRON SPECTROSCOPY and Related Phenomena

Subject index

2p and 3s core-level photoemission spectra
Non-local electronic effects in core-level photoemission, UV and optical electronic absorption spectra of nickel oxides 185

Amorphous RE-TM alloys
Magnetic phase diagram of an amorphous Er–Fe alloy studied by X-ray magnetic circular dichroism 165
Anderson impurity model
Influence of the band shapes in the Anderson impurity model 83
Angular momentum
Theo Thole and the graphical methods 127
Atomic multiplet coupling
Interplay between intra-atomic multiplet coupling and interatomic hybridization in core-level spectroscopy 65
Auger
Collected works of Theo Thole: the spectroscopy papers 25

Biographical data
Theo Thole at ESRF, 1990–1996: a personal appreciation 23
Branching ratio
Collected works of Theo Thole: the spectroscopy papers 25
Theory of simple spectra 41

CeO_2
Influence of the band shapes in the Anderson impurity model 83
Charge transfer transitions
Non-local electronic effects in core-level photoemission, UV and optical electronic absorption spectra of nickel oxides 185
Charge-transfer
Collected works of Theo Thole: the spectroscopy papers 25
Classical modelling of molecular polarizability
Thole's interacting polarizability model in computational chemistry practice 49
CO dehydrogenase
Bioinorganic applications of X-ray multiplets — The impact of Theo Tholes's work 175
Core-level photoemission
Core-level photoemission spectra of low-dimensional copper-oxide systems 119
Core-level spectroscopy
Sum rules for X-ray absorption and dichroism 139
Core-valence interaction
The 3d-4f exchange interaction, X-ray second-order optical processes and the magnetic circular dichroism spin sum rule in rare earths 73
Corner-sharing
Core-level photoemission spectra of low-dimensional copper-oxide systems 119
Covalency hybridization
Interplay between intra-atomic multiplet coupling and interatomic hybridization in core-level spectroscopy 65

Edge-sharing
Core-level photoemission spectra of low-dimensional copper-oxide systems 119
Electric quadrupole transitions
X-ray resonant Raman scattering from $GD_3Fe_5O_{12}$ 159
Electronic structure
Influence of the band shapes in the Anderson impurity model 83
Non-local electronic effects in core-level photoemission, UV and optical electronic absorption spectra of nickel oxides 185
Electrostatic interaction
Anisotropic branching ratio in X-ray absorption spectra 57
Theory of simple spectra 41

Exact diagonalization
Core-level photoemission spectra of low-dimensional copper-oxide systems 119

Fe/Cr/Fe sandwich
Cr magnetic moments in Fe–Cr layered structures 201
Ferrites
Fe $L_{2,3}$ linear and circular magnetic dichroism of Fe_3O_4 107
Ferromagnetic regime
Soft X-ray magnetic circular dichroism study of the colossal magnetoresistance compound $La_{1-x}Sr_xMnO_3$ 115

Graphical methods
Theo Thole and the graphical methods 127

Hybrid QM-MM methods
Thole's interacting polarizability model in computational chemistry practice 49

Impurity model
Collected works of Theo Thole: the spectroscopy papers 25
Intermolecular interactions
Thole's interacting polarizability model in computational chemistry practice 49
Intersite screening
Core-level photoemission spectra of low-dimensional copper-oxide systems 119
Inverse photoemission
The 3d-4f exchange interation, X-ray second-order optical processes and the magnetic circular dichroism spin sum rule in rare earths 73

Linear dichroism
Fe $L_{2,3}$ linear and circular magnetic dichroism of Fe_3O_4 107

Magnetic circular dichroism
Branching ratios of the circular dichroism at rare earth L_{23} edges 151
Orientation effects in soft X-ray magnetic circular dichroism 93
Magnetic material
Sum rules for X-ray absorption and dichroism 139
Magnetic moment
Cr magnetic moments in Fe–Cr layered structures 201
MCD sum rule
The 3d-4f exchange interaction, X-ray second-order optical processes and the magnetic circular dichroism spin sum rule in rare earths 73
Mixed-valence clusters
Non-local electronic effects in core-level photoemission, UV and optical electronic absorption spectra of nickel oxides 185
Multiband Hubbard model
Core-level photoemission spectra of low-dimensional copper-oxide systems 119
Multiplet
Magnetic operators for Ti^{3+} and Cu^{2+} ground states 133
Multiplet theory
Collected works of Theo Thole: the spectroscopy papers 25

Ni enzymes, hydrogenase
Bioinorganic applications of X-ray multiplets — The impact of Theo Tholes's work 175
Ni L-edges
Bioinorganic applications of X-ray multiplets — The impact of Theo Tholes's work 175
Nickel oxides
Non-local electronic effects in core-level photoemission, UV and optical electronic absorption spectra of nickel oxides 185
Non local screening
Non-local electronic effects in core-level photoemission, UV and optical electronic absorption spectra of nickel oxides 185

Paramagnetism
Orientation effects in soft X-ray magnetic circular dichroism 93
Personal recollections
Theo Thole at ESRF, 1990–1996: a personal appreciation 23
Photoemission
Collected works of Theo Thole: the spectroscopy papers 25
The 3d-4f exchange interaction, X-ray second-order optical processes and the magnetic circular dichroism spin sum rule in rare earths 73
Population analysis
Theo Thole as a Ph.D. "student" 17

Rare earths
Branching ratios of the circular dichroism at rare earth L_{23} edges 151

Rare-earth oxides
Interplay between intra-atomic multiplet coupling and interatomic hybridization in core-level spectroscopy 65
Reaction field
Theo Thole as a Ph.D. "student" 17
Resonant inelastic X-ray scattering
X-ray resonant Raman scattering from $GD_3Fe_5O_{12}$ 159
Resonant process
The 3d-4f exchange interaction, X-ray second-order optical processes and the magnetic circular dichroism spin sum rule in rare earths 73

Soft X-ray magnetic circular dichroism
Soft X-ray magnetic circular dichroism study of the colossal magnetoresistance compound $La_{1-x}Sr_xMnO_3$ 115
Solvent effects
Theo Thole as a Ph.D. "student" 17
Sperimagnetic structures
Magnetic phase diagram of an amorphous Er–Fe alloy studied by X-ray magnetic circular dichroism 165
Spin-orbit coupling
Anisotropic branching ratio in X-ray absorption spectra 57
Theory of simple spectra 41
Sum ratios
Soft X-ray fluorescence yield XMCD sum rules 143
Sum rules
Collected works of Theo Thole: the spectroscopy papers 25

Two-electron integrals
Theo Thole as a Ph.D. "student" 17

UV and visible spectra
Non-local electronic effects in core-level photo-emission, UV and optical electronic absorption spectra of nickel oxides 185

X-ray absorption
Anisotropic branching ratio in X-ray absorption spectra 57
Branching ratios of the circular dichroism at rare earth L_{23} edges 151
Collected works of Theo Thole: the spectroscopy papers 25
Interplay between intra-atomic multiplet coupling and interatomic hybridization in core-level spectroscopy 65
Soft X-ray fluorescence yield XMCD sum rules 143
Sum rules for X-ray absorption and dichroism 139
Theory of simple spectra 41
X-ray absorption spectroscopy
Influence of the band shapes in the Anderson impurity model 83
Orientation effects in soft X-ray magnetic circular dichroism 93
X-ray emission
Interplay between intra-atomic multiplet coupling and interatomic hybridization in core-level spectroscopy 65
The 3d-4f exchange interaction, X-ray second-order optical processes and the magnetic circular dichroism spin sum rule in rare earths 73
X-ray fluorescence
Soft X-ray fluorescence yield XMCD sum rules 143
X-ray magnetic circular dichroism
Bioinorganic applications of X-ray multiplets — The impact of Theo Tholes's work 175
X-ray magnetic dichroism
Collected works of Theo Thole: the spectroscopy papers 25
Fe $L_{2,3}$ linear and circular magnetic dichroism of Fe_3O_4 107
X-ray photoemission
Interplay between intra-atomic multiplet coupling and interatomic hybridization in core-level spectroscopy 65
X-ray scattering
Collected works of Theo Thole: the spectroscopy papers 25
XAS
Magnetic operators for Ti^{3+} and Cu^{2+} ground states 133
XMCD
Magnetic operators for Ti^{3+} and Cu^{2+} ground states 133
Magnetic phase diagram of an amorphous Er–Fe alloy studied by X-ray magnetic circular dichroism 165
Soft X-ray fluorescence yield XMCD sum rules 143
